

Town of Stoneham

Community Electricity Aggregation Program

Stoneham Community Electricity Aggregation (CEA) is a Town-run program that leverages the buying power of Stoneham’s residents and businesses to provide electricity options. The program started in March 2019 and has now been renewed for another 3 years. With Stoneham CEA, Eversource continues to deliver your electricity, repair outages and manage all electricity billing. The only change is the source and cost of electricity supply, selected through a competitive process by the Town of Stoneham. **You do not need to take any action to remain in the program: you will be automatically transitioned to the new supplier.**

What to expect in November

In November, you will see a notice on your Eversource bill to notify you that you have changed suppliers and that they will bill you on behalf of the new supplier. Seeing this notice means that you are part of the Stoneham Community Electricity Aggregation (CEA) program.

You do not need to take any action to remain in the program: you will be automatically transitioned to the new supplier.

If your November bill does not have the supplier change notice and if your December bill does not have Constellation - Stoneham AGG listed as your electricity supplier, you are not enrolled in the Stoneham Community Electricity Aggregation program. To enroll in the program and receive the group buying benefits, visit our website at stonehamcea.com.

Stoneham CEA Electricity Products

The following products and costs apply from November 2020 through December 2023 (37 months). Stoneham residents and businesses in the program receive the standard product unless you affirmatively select an optional product. In your new contract, the cost of the standard product will **decrease** from the current 10.898 ¢/kWh to 10.364 ¢/kWh.

Stoneham CEA Product	Local Green (Standard Product)	Premium 50% Local Green	Premium 100% Local Green	Basic
Cost	10.364 ¢/kWh	11.871 ¢/kWh	13.546 ¢/kWh	10.196 ¢/kWh
% extra of Massachusetts Class I Renewables	5%	50%	100%	0%
				

Note: A goal of the CEA program is to provide price stability and average savings over the full term of the program but future savings cannot be guaranteed compared to the utility's BASIC SERVICE rate which changes every three months for industrial customers and every six months for residential and small commercial customers.

New clean energy option

As we have done since the start of the program last year, the Local Green standard product will provide an additional 5% Massachusetts Renewable Class I electricity and we are continuing to offer a 100% option for those who want to do more to decrease their impact on climate change and carbon emissions. With our next contract, we've added another option of **50% additional renewable energy** above the state minimums for those who want to start decreasing their impact.

Delivering Clean Energy & Value to Stoneham

Supporting New Renewables in New England

Over the last twelve months, Stoneham CEA used about 3,900 MWh of local New England-based renewable energy (MA Class I) above and beyond what is required by state law. This additional renewable energy equates to the annual output of one land-based wind turbine (~1.5 MW). Participants who select **Stoneham Premium 100% Local Green and Stoneham Premium 50% Local Green** help our region increase the development of renewables and decrease our reliance on fossil fuels even more!

\$600,000+ in Savings

Since the program launched in March 2019 through July 2020, **Stoneham CEA has delivered over \$600,000 in savings to our community compared to Eversource BASIC SERVICE supply.** Since the Eversource BASIC SERVICE rate changes every 3 months for industrial customers and every 6 months for residential and small commercial customers, there is no guarantee that the program rate will be below the BASIC SERVICE rate in any given month.
